

# FLY BAIT

READY TO USE

2 Kg

1% AZAMETHIPHOS

# Sheila

## Granular Fly Bait

CONTAINS Z9 FLY SEX PHEROMONES

# SHEILA RB1 - Granular Fly Bait

Insecticide to control flies in livestock buildings

SHEILA 1% Azamethiphos

## STATUTORY CONDITIONS RELATING TO USE

For use only as an insecticide by professional operators. SHEILA should be applied to areas of fly activity and placed out of the reach of animals. SHEILA is made from a secret formulation of attractants and Z9 pheromones which makes it an ideal product for monitoring fly activity as well as achieving outstanding knockdown results. Flies are literally lured to the product on which they feed resulting in instant death. SHEILA should be applied as soon as flies are seen. SHEILA should be sprinkled into suitable containers and placed where there is fly activity. Alternatively the granules can be applied directly onto the SHEILA and TWENTY-ONE boards, or alternatively boards with a suitable surface. Lay the board down on a flat surface. Evenly spread the granules generously but in thin layers to cover the board. After the granules have been applied to the surface lightly spray them with a very fine mist of water or cola. This will ensure that the granules stick to the board and also increases the efficacy of the poison. The board should then be left to dry before hanging. Fly bait is the preferred method of treatment for the control of common housefly.

200g/100m<sup>2</sup> surface area to be spread in different places. Repeat after 2 to 3 weeks if necessary.

NB: Replace the bait if it is covered in dead flies or dirt. Not effective against horseflies.

Destroy the packaging and dispose of it in accordance with local regulations. The packaging should not in any circumstances be re-used for other purposes. Do not allow the product or empty packaging to contaminate ponds, watercourses or ditches. In order to avoid having product left over after application, endeavour to calculate as accurately as possible the amount to apply, based on the area to be treated.

Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval

**READ ALL PRECAUTIONS BEFORE USE - HSE No 9352**

To avoid risks to man and the environment, comply with the instructions for use.

- The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work.
