

# 10 METRE FlyGlue ROLL

**DIGRAIN**

- 2.6 m<sup>2</sup> Highly effective catching surface
- Non-toxic , faster catch rates , active for longer

## 10 METRE FlyGlue ROLL

*A professional fly glue roll ideal for eliminating nuisance flies. This product is suitable for use against all fly species and is specially designed for use in all animal housing.*

(milking parlours, pig / chicken units, stables, cow and sheep sheds etc.)

**DIGRAIN**  
10m Roll (2.6m<sup>2</sup>)

The design of the Fly Glue Roll is unique, combining a shiny surface, a unique pattern of flies and red lines, attractive glue and sex pheromones. This unique combination has a fatal attraction to all fly species. The glue will not stick to your fingers but will catch the flies at the slightest contact.

It does not contain any insecticide, is odourless, environmentally friendly, biodegradable and can be used in the presence of animals.

**Directions for use:**

1. Tear the label away from the roll. Do not remove the handle from the roll.
2. Hang handle on a hook or nail
3. While holding onto the handle, pull apart as much or as little as needed of the fly roll, minimum 50cm or maximum 5.20m
4. Attach the leading end to ceiling, wall or beam, using a hook or angled nail
5. Roll can also be hung straight down, vertically to the ground
6. For best results, unroll the product with glue surface facing the ground. Flies are drawn to the sticky side of the trap

**Description:**

- Highly effective thanks to its patented 3D pattern and fluorescent colour.
- Non-toxic, environmentally friendly fly control.
- Effective, biodegradable and environmentally friendly for use in all animal housing.
- Can be used all year round.
- Active 24 hours a day for 6-8 weeks or until the trap is full.
- Flies like to be in places where it's warm and sunny and where the ventilation is poor – ideally in a south-facing window.
- Find out where flies prefer to be in the area that you wish to treat, and set up your fly paper there.
