RAIN RESISTANT

BEE FRIENDLY

CHILD AND PET SAFE

NATURAL, NON-TOXIC SLUG & SNAIL BARRIER GRANULES... PERFECT FOR ORGANIC GARDENING

2L e

ecofective® Slug Stoppa Barrier Granules are a natural ready to use granule that can be applied around the base of edible and ornamental plants both in the garden and plant pots, to protect against slug and snail damage. This product is derived from natural ingredients and repels the slugs and snails.

Instructions for use
To protect your plants use the instructions below

Garden areas:
When planting out into the garden areas, unless new compost is used, then slugs may be present in the planting area.

 Place the granules close to the stem of the plant in a complete circle using up to 15g-20g (small handful) of the product.

 Apply granules up to 2cm in height.

Pots & tubs:
Place the granules close to the stem of the plant in a complete circle using up to 15g-20g (small handful) of the product.

 Or you can apply as a decorative dressing around all your plants to cover the entire top of the pot or tub.

Please note: The product works best on newly planted pots & tubs, as established pots & tubs may already have slugs and snails present, so control could be reduced.

General Advice
Do not apply in windy weather. Supervise all children in the garden area during application and wash hands after use. Children and pets can use the treated areas immediately after application. Keep the pouch stored in a dry place away from children and pets. Contents may settle during transit.

*Safe to use around children and pets when following the label instructions for use.

HAPPY PLANTS HAPPY PLANET
Creating a garden full of happiness has never been simpler. By using ecofactive you're not just making the right choice for your plants, but also for the planet too. We use formulas that are child and pet safe and wildlife friendly too*. Find out more today by scanning the QR code above.
