Three Waves Integrated Mouse Repellent

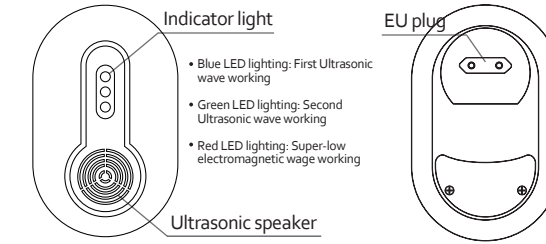

User Manual

Dear customers, thank you very much for purchasing our products. Please read this user manual carefully before using this product. If you have any questions about your order or this product, please feel free to contact us.

Model: AR26

Working Principle

Adopting modern micro-electronic technology, this device can give out 3 kinds of electronic waves simultaneously and alternatively: super-low electro-magnetic wave and 2 kinds of special ultrasonic waves, which can act upon the hearing and the nervous system of the mice to make them unpleasant and uncomfortable. So the mice will flee away.

2

Usage and Coverage

1. It mainly can expel mice and rats.
2. This product can be used in the following places: family, warehouse, shop, restaurant, hotel, hospital, office, machine room, grain depot etc.
3. Each room requires a minimum of one unit and one unit is enough to cover 50m². For a larger room or an L-shaped room, more than one unit is needed. For best performance, keep the unit on day and night.
4. Make sure mice and rats have no access to food. Store food in sealed containers, keep cooking and eating areas clean.
5. Block all holes and openings where mice or rats could get into the house. Diaotec Indoor Ultrasonic Rodent Repellent with steel mesh is ideal for blocking rodents.

3

Parameters

Power Voltage	AC110V-220V
Product Consumption	Less than 15W
Frequency of Electromagnetic wave	0.5Hz-8Hz
Frequency of Ultrasonic wave A	20kHz-55kHz
Frequency of Ultrasonic wave B	35kHz

4

Operation Methods

1. Plug the Repellent into the socket of AC110-220V/50Hz.
2. The red LED will be flashing which indicates the super-low electromagnetic wave working. Meanwhile, the blue LED will remain which indicates the ultrasonic wave A working.
3. After 80 seconds, the green LED lighting then the blue LED off, the ultrasonic wave B begins working while the ultrasonic wave A stops. They work 80 seconds alternatively.
4. After 160 seconds, the red LED is off, the super-low electro-magnetic wave stops working. It works at intervals of 160 seconds.

5

Precautions

1. Never use the device outdoors and never put it in high-temperature and moist places.
2. AC 220V/50Hz power system must be confirmed before using it.
3. It should be used continuously without stopping.
4. It should be installed as low as possible from the ground because most of the mice running on the ground. Moreover there should be no obstacles in front of the device.
5. The effects will be seen after using it. But the best effects will be reached after using it continuously for 3-4 weeks. Sometimes the mice may be more active at the beginning which shows the mice have been irritated. Then the mice will be away after a period. Even not flee away at once for few mice, they will become listless, poor appetite and will lose their reproduction and invasion ability.

6

Main Features

1. Modern micro-electronic technology provides a poison-free way to repel mice and common pests
2. 100% safe and eco-friendly, economical choice to chase mice and common pests away
3. 3 kinds of electronic waves work simultaneously and alternatively
4. Super-low electromagnetic wave works 160 seconds at intervals of 160 seconds
5. 2 kinds of special ultrasonic waves work 80 seconds alternatively
